Tried to pull one over on you  
It didn't turn out the way I wanted it to  
But I'll try again and this time I won't give up this time I  
won't give up on you.  
I will never compromise and I will never keep my  
promises to you  
I will lie to your face I will lie to your face.  
It comes back around again it was.....  
I will never compromise and I will never keep my  
promises to you  
I will lie to your face I will lie to you face I will lie to your  
face I will lie to your face.  
It comes back around again  
It comes back around again It comes back around  
again.
