[Intro:]

Never ever make a sound  
Never ever make a sound  
Never ever make a sound

[Verse 1: Outasight]

See, this is the part where I let it go  
Never been one to ever-ever fuss and fight  
The spotlight's on, now it's time for the show  
Where everyone except me seems to be alright  
Oh my-oh my future is in the hands of you  
No lie-no lie, it seems to scare the shit out of me  
The fact remains the truth's the toughest pill to swallow  
Do you have something to drink that I can borrow?

[Hook:]

See you hear you, don't you let go, oh  
Feel you don't quite get me, you never do  
I only hear what I want to hear  
So tell me something good now that I'm here  
I said ten-four and over and out  
Copy, I get what you're talking about

[Verse 2: Outasight]

See, this is the part where it let it go  
Never ever been one to agree to disagree  
Didn't sign up to watch from the front row  
I thought the world revolved around me  
Damn this dialogue get's so confusing  
Not understanding, I feel like I'm losing hope  
For every word that you scream or utter  
Goes in one ear and out the other  
Motherfucker won't fight for long, used to argue just to argue  
See the odd truth that I liked it  
Later on, I moved onto a different ensemble around truth  
Hmmm, despite shit seeming like it never gon change  
So far gone but really lack range  
Not all the pitfalls come with fame  
Being regular is hard enough, so pick a side, ala carte

Do you listen to them or do you do what you want?  
I may be stubborn but unlike many others  
I don't get offended when people act above us, I say  
fuck 'em

[Hook 2:]

See you hear you, don't you let go, oh  
Feel you don't quite get me, you never do  
I only hear what I want to hear  
So tell me something good now that I'm here  
I said ten-four and over and out  
Copy, I get what you're talking about  
I said ten-four and over and out  
Copy, I get what you're talking about  
Ten-four and over and out  
Copy, I get what you're talking about  
Ten-four and over and out  
Copy, I get what you're talking about  
See you hear you, don't you let go, oh  
Feel you don't quite get me, you never do  
I only hear what I want to hear  
So tell me something good now that I'm here  
I said ten-four and over and out  
Copy, I get what you're talking about

[Outro:]

Never ever make a sound  
Never ever make a sound  
Never ever make a sound
