Watch the rubbish on TV
watch it bobble up and down down down down
it goes like water
it shows you nothing
or just enough to keep you docile..

breathe, why dont you breathe, I got your back man
kick your tv in, why dont you kick it
keep the frequencies from coming in
but you just keep on watching

when is static a disease?
when its not upon the screen now, now now
your mind is curved now, but not like space time
more like when a child draws a rainbow..

breathe, why dont you breathe, I got your back man
kick your tv in, why dont you kick it
keep the frequencies from coming in
but you just keep on watching
breathe, why dont you breathe, I got your back man
kick your tv in, why dont you kick it
keep the frequencies from coming in
but you just keep on watching

EINE ZWEI DREI VIER!

breathe, why dont you breathe, I got your back man
kick your tv in, why dont you kick it
keep the frequencies from coming in
but you just keep on watching (x2)
