Life is cruelty
Life is cruelty
We all feed on each other
Exploit each other in some way to survive
Life is cruelty

If you found the sun in me
Would you make me work until I died
Would you count the times I laughed
Would you count all the times I cried

New machines and the wasted life
New machines and the wasted life
New machines and the wasted life
New machines and the wasted life

Life is cruelty
We all feed on each other
Exploit each other in some way to survive

If I found the sun in you
Would you use it just to get your way
Would you use my broken back
Would you break me every day

If we found the sun in us
It would never be the same
We would never have to break
We would never feel such pain

New machines and the wasted life
New machines and the wasted life oh yeah
New machines and the wasted life
New machines and the wasted life

New machines and the wasted life
New machines and the wasted life oh yeah
New machines and the wasted life
New machines and the wasted life
