

Opiate For The Masses **"Running From Yourself"**

Visit "[Running From Yourself](#)" on MotoLyrics.com

You wanna save us all
You wanna take us and
Lift us through it all

The only problem is
I chose to fall

You want to set us free
(Don't want your charity-
You don't know what's right for me)
You'll never hold your tongue
Never let us be
(Don't want your charity-
You don't know what's right for me)
You never stop to think
What's best for me

You're only running from yourself
(You always gotta have an enemy)
You're only running from yourself
(You try to take me, but I'll never be)

You wanna save us all
Worried about all of those
Who chose to fall

The only problem is
There's none to solve

I can't believe my ears
(I hope the end is near-
I want the cloud to clear)
Try to pretend to the end
That you beat your fears
(I hope the end is near-
I want the cloud to clear)
You're still afraid of me
After all these years
