I know it's coming and its late at night
not sure if you are listening
there's a strange vibration rushing through my veins
you are the light i cannot see

The way of the wave
The way of the wave
currents rushing through my life day after day

i watch the sunset sink beneath my sky
are you the one i really need
like the waves that wash upon your perfect shore
take me to new depths never seen

the way of the wave
the way of the wave
currents rushing through my life day after day
