Say have you heard the news  
Riots, looting and shootings  
On the tube  
As clouds of smoke  
Rise up into the air  
Sez it looks like trouble  
So you better beware

Theres gonna be a confrontation  
A civilian uprising  
In the united nation  
A youth named robinson  
Been shot and killed by the police  
And now the politicians  
only talk of justice and peace

But I and i  
Don't want no talk of peace  
We want is action  
Justice and equality  
Cause every day I and I  
pay the price  
Its blood sweat and tears  
And you know the price is high

Violence and police brutality  
Fill the city  
There is too much  
Social and economic inequity  
The rich man digs his wealth  
From the ghettos  
While the poor man  
Only puts his trust in vanity

Thats how it is  
And thats where its at  
Seems the only solution  
Is a revolution  
We got problems to solve  
Involving us all  
And we have to build  
A brighter future

What I and I need  
Is love and unity  
You got to liberate your mind  
Be the most that you can be  
We don't need no  
Hatred and rejection  
The false teachings  
Of society

Theres gonna be a confrontation  
A civilian uprising  
In the united nation  
The neighborhood is burning  
And the world keeps on turning  
Say you can watch it  
On T.V.  
Can you believe it oh wow

Say have you heard the news  
Riots, looting and shootings  
On the tube  
As clouds of smoke  
Rise up into the air  
Sez it looks like trouble  
So you better beware

A confrontation  
In the united nation

A confrontation  
In the united nation
