

## Postman "Change"

Visit "[Change](#)" on MotoLyrics.com

I want it I need it I got that change  
First I didn't see it now I love that change  
And it's still the same me only thing I had to do is  
believe  
Now I make that change  
Will you make that change  
Can you make that change  
I'm glad I made that change

Don't start a fire inside 'em you can't fight  
them  
Can't stop kids from wanting to be like 'em  
The mind still bright and his life still excites 'em  
Still writing history timing is still Breitling  
Still make music still do that for love  
I still, keep faith not everything's lost I build  
It's not finished I still want independence  
Managed to pull the menace from society like Dennis  
My best friend told me that change is good  
So I bought myself a ticket like change is booked  
Changed the look so I changed for good  
Came back told them I was happy about the change I  
took  
As long as I'm dreaming I believe that I can yes I will  
still  
Following my guts, I started up as a fan  
I was young and had a dream  
Make sure to let nothing come in between  
Just waiting for that light to go green

I want it I need it I got that change  
First I didn't see it now I love that change  
And it's still the same me only thing I had to do is  
believe  
Now I make that change  
Will you make that change  
Can you make that change  
I'm glad I made that change

Still have a lot of eyes that watch me  
Try to shut the door, change the locks, try to stop me  
Snap me like paparazzi, still..

Top of the bill as clear as skies above me  
At times I wish that I could chill, still wishing it was just  
a hobby  
Nobody witness seeing that change I'm still  
building  
I'm back to scratching the surface, I might just hurt  
feelings  
Too many bias, too afraid to acknowledge  
Sometimes you need a fresh start like cars with no  
mileage  
Sometimes you need that battery charged open your  
eyelids  
Sometimes it takes changing a man to stop being  
childish  
Plans and life private team small and dream logic  
Just had a change of heart been holding bars like a  
convict  
No longer chase dreams that shallow my matter vast  
The older I get stronger I know they matter less  
The years I've been putting into it can't get  
them back  
Just a couple pages in history black

I want it I need it I got that change  
First I didn't see it now I love that change  
And it's still the same me only thing I had to do is  
believe  
Now I make that change  
Will you make that change  
Can you make that change  
I'm glad I made that
