I see you in town  
Mood has changed  
Walking in a round  
between the rubbish and the waste

We're changing  
everyday we're at different positions  
me and you

We're messy  
But everytime we're solvable  
me and you

We're like a Rubik's cube

Everytime that I met you  
You were someone else  
tried to recognize  
But I didn't see through your eyes

It could be a great depression  
Maybe you'll find someone's grace  
You will be deposited  
so that you'll be solved, at original place
