You defy the sky, the weather  
Thousand volt electri-go-round  
Like a flash that splits the air and  
The photo boys holler out

You are the moment  
I wanna be your in-between  
You are the moment  
I wanna be your in-between

If I could capture you forever  
The future perfect into the past  
Technicolor, cinematic  
The images never last

You are the moment  
I wanna be your in-between  
You are the moment  
I wanna be your in-between

The night crackling™ as the cameras zoom  
Reporters jockey as you enter the room  
The wave, the rush, the beat, the moment is gone  
Looks like someone new™s come along
