I've been away from you for so long  
Still every time I think of us, I get blue  
But all I can do is dream you

I close my eyes and love so warm and tender  
I feel you touching me  
I close my eyes, I don't even have to try  
It comes so easily

I don't know why I ever let us drift apart  
But look who's sorry now  
'Cause every time I wake up and you're not around  
It only brings me down

Oh baby, all I can do is dream you  
All I can do is dream you  
Ah baby, all I can do is dream you  
All I can do is dream you  
Here I go, dreaming you

Everyday I pray, that somewhere down the line  
We will meet again  
I'll find a way to get you back somehow  
But baby until then

Oh baby, all I can do is dream you  
All I can do is dream you  
Yeah, all I can do is dream you  
All I can do is dream you

All I can do is dream you  
All I can do is dream you  
All I can do is dream you  
All I can do is dream you

All I can do is dream you  
All I can do is dream you
