I've been away from you for so long
Still every time I think of us, I get blue
But all I can do is dream you

I close my eyes and love so warm and tender
I feel you touching me
I close my eyes, I don't even have to try
It comes so easily

I don't know why I ever let us drift apart
But look who's sorry now
'Cause every time I wake up and you're not around
It only brings me down

Oh baby, all I can do is dream you
All I can do is dream you
Ah baby, all I can do is dream you
All I can do is dream you
Here I go, dreaming you

Everyday I pray, that somewhere down the line
We will meet again
I'll find a way to get you back somehow
But baby until then

Oh baby, all I can do is dream you
All I can do is dream you
Yeah, all I can do is dream you
All I can do is dream you

All I can do is dream you
All I can do is dream you
All I can do is dream you
All I can do is dream you

All I can do is dream you
All I can do is dream you
