Just don't think about it, do what you do baby just get  
ride it

And that means your thoughts just let your body

Do what it do, get on the floor tonight

Just don't think about it, do what you do baby just get  
ride it

And that means your thoughts just let your body

Do what it do,

Loosen up the custom, to the side

Cause I feel alright, walk up in the spot and get drunk  
all night

You know how I do, me just post it, six fold it, us coast it

And I'm with the crew, who want one, and we got  
dollars

Spend it up, who came to party

Who's gonna drop it and let it go

I'ma get drunk tonight, hitting out a, and my cup  
tonight

Feeling good, cause look at all the ladies

Looking right she giving me the eye,

So I think I might go and have to back it up tonight

Gonna get it, she'll be coming home with me

She win, don't give it up, baby put your hands up, don't  
shake it up

Dj turn me up, it's all tonight

Just don't think about it, do what you do baby just get  
ride it

And that means your thoughts just let your body

Do what it do, get on the floor tonight

Just don't think about it, do what you do baby just get  
ride it

And that means your thoughts just let your body

Do what it do,

Ain't nobody over here,, over here, it's just love

Lady showing love to the thugs

And that's what we want, busy on the beat

Making... beats from the back blow it up

So I know it's the same old thang every Friday's like

Ladies at the bar popping, can't get no better  
Sudden call you over, I ain't got a choice to go on  
Get drunk tonight, hitting out a, and my cup tonight  
Feeling good, cause look at all the ladies  
Looking right she giving me the eye,  
So I think I might go and have to back it up tonight  
Gonna get it, she'll be coming home with me  
She win, don't give it up, baby put your hands up, don't  
shake it up  
Dj turn me up, it's all tonight

Just don't think about it, do what you do baby just get  
ride it  
And that means your thoughts just let your body  
Do what it do, get on the floor tonight, and I don't care  
what people say  
Just don't think about it, do what you do baby just get  
ride it  
And that means your thoughts just let your body  
Do what it do, let your body, let your body yeah

Sound so good to me, you gotta get on, get on up  
Hey, yea, hey yea, get on up, now  
So you know that it's, get on up,  
Gotta get all up

Let it go, no logic, fly it in an unidentified object  
Holly... with job down at Nasa  
Baby girl with it I'ma hit it like Casius  
I speak in her ear, she reply, use a mess  
When I'm in it got her screaming like Callie, you the  
best  
Read some a, let me know,  
Wake up in the morning and we like what happened?  
Got one homie, remember when was back at the day  
with the quiet youngsters  
... we meet up today and make something like this,  
right?  
That's how it's supposed to be though, gotta keep it in  
the family  
, I am busy, drink... come on.

Thanks to Andrei
