Sub-title:

Travling into the science of thought.

Word Song -Not Music Song

Introduction To Eschatology Psychics:

In the comprehensive book - you will learn what cause's sickness and disease threw most often sections of spiritual

anatomy. This book is strictly on parapsychology levels. The influences in this guide is retrospection.

The reality we teach in this book is about the prominence of reality and body. It's the decadence that profound, the factors of reliability the conception of eulogy.

How have body and not have after life.

This book explorers and tells all and numerous things that's going to go on in the afterlife.

Also In the physical life. The prospectus in the regional rectangle, thus forth the measures of magnetic influences.

The True source to this world is the spirit, the reason why this "derogative" (Suffix de: Away,off) (Suffix change of "pre" rogative to "de"rogative)

belief is true, is because the humans that created the bible gave the spirit the name god, because they found out that the spirit is the true source to all pains and diseases and feelings and emotions.

They could've chosen a different name than god; however,

it would've meant the same thing as god. I am nautical in the presence of the nauseated process.

The Reality wars are concluded. The realm is of conception.

The diatonic scale of spirit -

is not the mind, this is pertinacious, it's also realization, and in that, it is prevaricated.

However, it is gratuitous to be relevantly perspicuous.

The world mass's are in that sight full - they are there

and they are real. The conclusion is not concluded.
Some sources say that no people that have died will be judge, on if they were going into heaven or hell until the world ended and then they would be judged. Though the fact is entwined that each person who dies are already dead - with this centurion belief - the palisades would be someone being dead for three hundred years and R.I.P.

There is no such thing as resting in peace - once dead this is complete.

Being dead means in this book means "receptory".

It means being within your body and realizing what you're going through and never resting because there is an ongoing process of "receptory" - Resting in peace in this book means being dead and sleep with never seeing

anything as a being. Body can be cremated, though in reality,
body never dies.

Redemption:

The measures of the reticule, is that warts of reality are bias, to production so there for in that production is bias to spiritual anatomy , and that within body is conductive of invisibility - so therefore body is transmigration use.

Transmigration Use (TU)

is meaning that when a human is conceived that their body was transferred into a spiritual being; Spirit is in control not human - and with that in protis and with that in conductive energy. The natural cause law's states that a baby must first start crying - that's the natural process of birth. Baby has no intelligence - baby

is spiritually transmigration.

We're not using mother, father and family in this book as reason for baby's too learn , which is because - they mother and fathers have been transmigrated also at birth

- and the transmigration has been going on for so many

years that - we have to diabolically judge them the same

paranotic (para ; above or beyond) (notic:nautical) sense

that we do the newborn. Our indecisive reasons are inept.

In reality humans created sin -

the humans somehow transmigrated spirit - to go against their ways - that in a rhetorical

sense that spirit created the water, ground, moon and stars and all feelings and emotions and all things that's possible to be said and done. However this book show's that part of the spirit has been transmigrated to human - with that such relevance Human transmigrated sin back to the spirit - in such that when and how sin is wrong: Making Spirit Believe What The Human Believe Is True. That's how deaf is transmigrated. Therefore, in such ways what humans believe in is the propellant truth and will be what spirit believes in which leaves spirit higher than man and more powerful.

Lessons:

We Have 30 chapters in this book, each chapter has 25 lessons. Lessons are sub-chapters with sub-chapters heading. The self-residue - is what includes in the purpose of the relocation of earth, the source of grave is such in which heart is atmosphere. The rather is dependent on constitution of hemoglobin. The rest of the scientific clauses is the evident breath - the measures - of the logic's - and he is the nature of the frolicsome - and they can be what is relates to the course methods. We designed this book to step out of normal writing. Medicine is no longer real and is a hallucination. Spirit is the only real true nature. In addition, will always be - humans have no control over the body - rather it be writing, talking, or anything else. This solitude is compacted. Not Reunited. Just incapable of strenuous cause's. The Reality VIEs (Bridal Glossary) are pretentious. How be the solvent but then be the irrelevant. How comatose, these first phases are. This first production is a patriotic commencement. The world's soul is now becoming challenged. It was always challenged. The chalice of thought bewildered the desiccation of the world's choices.

Transmigration Use:

The Transmigration use was perilous and that is why the world wouldn't end - the "temptuous" heart is what's not umbilical. We'll study with in this writing the spiritual causes of redemption.

Will timpani but thus into the grasp will be dormitory.
The reflection of each human is only mere concise.
Though with the perspiration of ecology with the
corrective abrasion of ambiguity.
This is why the masses of land seam real,
that, in its in-formation contention.
The walls of equator.
Now we can have sense on why other planets
as simplistic as Planet earth.
The dichotomy for the ways of stress,
which would be of the precinct to go
against the ways of the world.
It was all "minoritie" created and distinct
from what reality each separate being would have
wanted.
However, the secretion of gratitude
is based on heuristic clause.
The wind is the projection of delusion, how can
I say this - it is very easy, you just have to
understand parapsychology as we teach it in this
book by Harry Devon Johnson. AKA REgardless Devon
The mere dark pass's will be shown.
The implicit bacteria is not really their
as we stated every humans life is a dream;
how did these dreams occur and who had the first
dream.
Mediocrity is in the bible - that's why this is clairvoyant
over everything. There is no GOD - only spirit with exact
powers that's as in used as why they use the word GOD
as higher. The reticule has been sadist - the frequent
game is never really about dying to each being who
has
passed. The truth is conscientious that and the fact of
pretentious. That's now intravascular.
So we rise in it's intense moment.
That's the culprit - now that we only stick to
clairvoyant aspects in this book; be parlance and
vicariously warned.

Not For The Meek:

This book is not for the meek or the judgers.
This book is for beings of a higher predicament -
cause the ones who won't understand usually never
stick with having Christianity degrees and reading
a lot toward eschatology and having degrees in
parapsychology.
Though everyone who reads writing as
this is not adequate to what we decadence may;
could understand; The Path Is not of judication;
so the imperial fraction is noted in the revolve

that mind state is temperament has to be temperament.

The re-inclusion. Some state that when a human is first baptized that's when their spirit is created and appears, though if that was true that would mean that their spirit was only resting - we'll say in sole mode, until another spirit sees it. However we believe in this book that baptizing should be obligatory only at 18 years of age or never.

Transmigration Use Explanation:

When each human is baptized, they are selling their soul to the spirit. In other words the birth transmigration where each human born becomes property of the spirit. As we spoke of in this past passage, this is human transmigration use, where spirit adapts to what humans do.

Spiritual transmigration use, which is when spirit knows everything and controls the human.

The human body is not yours your only using it.

The resurrection just told me that it was real.

The real reason kids get baptized is because it's

Common Human Transmigration Use ;(CHT) which is when humans make's other humans and teaches them and

forces them to go through whatever they been through.

Now we have ominously grasped three transmigration uses.

Spiritual Transmigration Use, (

STU) Human Transmigration

Spirit Use (HTSU) and Human Transmigration Human Use.

(HTHU) The Ambiguity is the crest of a bigamist, vows of such and more. STU really wanted lust and crime

and it was good, that's why to this day sex and crimes are commenced.

However, HTSU has been commenced to look at what spirit

created as wrong though never blaming spirit and blaming

Satan. In this book Satan and God is the same - there's no one or nothing that can get over what the highest spirit has created. HTHU has changed this, not necessarily changing it bad,

though it has exponential influence on implications.
Words created by humans are not real in this book.
These are being used because, that's the only way
humans can understand.

Seeing Greatness & Vague:

Optometry is when the occlusions are
premeditated now the diffusion is on replication,
seeing is understanding though passion is destruction.
Charms are clarity where in curses are passion.
Water is fake where in weather is stronger.
Heart is fake where in soul is probable.
These scale's of life is gratuity, because deaf is not
deaf.
Though power of fainting and taking humans is
higher - dreams are shorter - though deaf and dreams
are ubiquitous. After life is fuller. Though you dream,
living dreams are not after life.
Though when you're dead dreams are now afterlife.
Though when you dream you wake up, when living .
When dead if not dreaming you're blank as in times
when living and being sleep and never having a dream
that night. However, when dead if not blank you're
always seeing.
We'll be exploring these areas in fruition
in the future of this book.

The Five Senses':

The deepest part of the world is there,
you just can't reach it, and you may can't get to it.
Also, what we'll be talking about and learning in
this book is Physical and spiritual deaf - spiritual
deaf is separation of man from his soul and spirit.
Physical deaf is separation from the soul and the body.
Original sin (inherited sin) is the total corruption
of our whole human nature. Man by nature is without
true love and trust in god. He is without
righteousness, is inclined to only evil and
is spiritually blind. The penalty for original sin
is spiritual and physical deaf. Spiritual Deaf is
the separation of man from god. Physical Deaf is
separation of man's body from his soul and spirit.
Actual sin is every act committed against the
commandments in thought, desire, word or deed.
It includes the breaking of god's laws, omitting
or neglecting to do what is right or going against
the dictates of god. What is the penalty for original sin?
The penalty for original sin is spiritual and physical
deaf;

spiritual deaf is the separation of man from god.
Physical deaf is separation of man's body from his
soul and spirit.

We'll be exploring these areas also in this book.

Now the fallacy is that constitution in the ruff
draft of spiritual consequences. These rules do not
look down on people who curse negative - this
is because STU - however that doesn't mean someone
won't die, because of this - Harry Devon has "know"
belief in this. Though there are known scriptures out
their that talk of this. We're Not logically using
other humans writings. This is from our educational
experience. If you prefer to know on other authors -
I think that you should be studying Christianity and
other areas of this sort. After all this book is
really for the intuition of people on this level.

This very, Very, HIGH Intelligent level.

Into the after affect in chapter one: Earths Creation,
we learn how humans and the whole entire universe
and

other universe's were created threw dreams, which is
just a different dream than the dream that everyone
that lives on planet earth is having right now.

And which is different from the dreams that the
people who have lived on planet earth and that
died and have - and or is and or will be going through,
The conjunction is self deprivation how is this
convalescent.

The destruction is not real.

We try to teach that pain and fear
is not real. Some sources say that when
people die they can't feel fire so they
can't burn in hell - so the sources say that
they hell will be in back to back horror dreams.

We Believe in this book that pain is not real
in dreams though fear is - you can be scared
it's like a subliminal - it's a natural cause
thing where you must fill scared it's no way
to escape it unless something of a higher power
release's this. In reality the world you live in
right now is a dream - so if you die anything you
feel and go threw while living can get to the way
you feel and or felt in the normal world.

This is the pass's of the reality of the sanction -
you can become dilapidated into some seen that is fit
for you.

Keep In mind that this is an on going process - and
this delivery is the residue and that most passion is
earth.

That is "soblank" - that's the institution of the mind.

You can't just say and think of what you want.
This book will explore this area.
The more you can create and substitution for reality -
you
can have wiser wisdom - and this is not stopping for
the increase in dissolution.

Chapter 1. Earths creation:

Lesson One: Birth

In congeniality we see that spirit consists of
multiple things. Those things are supposed to be
fictional and invisible - they are not real.
For the hemisphere of the mind is there.
The percolation is insignia.
The level of creation threw modification.
How did the humans come into play.
The real tertiary force - is association also dissociation.
The breath of man made things are all mirages
that are supposed to be excepted as real.
Thus forth challenging this may seem - they land
and the world was created threw dreams.
Some can say how is this it's very very complicated -
this universe from some sources say that the universe
have been their for years and years. Millions of years.
We can say if the whole world was a dream on
a-day-2-day-basis
and you had to stay woke when you wasn't sleeping on
a-day-2-basis -
no mater what, and that's a dream.
If that's the case Then explain why
if we were human and living ,why when
we sleep and dreaming why don't we stay
in the dream instead of waking back up
on a-day-2-day-basis.
That's Two interesting questions that will explore.
For instances you never really wake up from each
dream -
the spirit is just smart enough to remember everything
that you last seen before you went to sleep.
So it appears that you we're only dreaming and now
back
to a-day-2-day basis.
The rates is how be at one with this pre-temp.
That's why a lot of people pray or believe in a god.
The sorority is really in it's digestion - for the
rest of the people. Now that the reclusive justice -
for the dreams - this fortification. The real source
to life and the after effect - it's not at this stage
if you read this far with-in this book that you don't

understand how humans were created threw dreams - it's probably about a CHT on a level of understanding everything to control your on dream and what you go threw - it's impossible. Though you may can pray for the spirit to change something. The spirit is ignored toward humans especially humans that are forced to look in the spiritual words. In this universe today there are only three worlds which are and consist of - The Physical World - The Dream World and the spiritual worlds - any time there is educational books that spiritually talk about other worlds that aren't these top three, them other worlds are included in one of the top three to something. It may consist of worlds of only monsters worlds with anything not of norm or different. More for education that is fiction or mythology. There is "congestively" so many, many "Know" things that can go on in each world. All worlds even if I didn't use them all. We believe this though in this book - since everything is a dream in it's entire'te some aspects are different.
