I am more baby
See I let the jay upon it
Anyway you want it
Name the place and time
So I can... your body tonight
I am not gonna waste my time and just
I am gonna give you something more
Something real something is gonna make you feel love
like
Girl what I am gonna give you is gonna last all night
So I am telling you make sure you are coming home
Cause you've been looking for something real like me
Put it down so come back... let's have...
Don't be scared to fall
My mission is to make you mien tonight
See baby I got you opened and ready for this love you
never had
I am gonna have you say oh
So I am gonna take my time with you girl
Tonight I am gonna have you feeling like
This this this this this this this this this
I love that you beg on me

See I am... late about it
So take your heels off jeans off
Down... I am a pro for this here
Ain't no need for volunteer
... not everybody to... I am gonna put that... on you
All night cause you know I am the man for the job
So come on baby let's... the moments
Don't be scared to fall
My mission is to make you mien tonight

Chorus

See baby I got you opened and ready for this love you
never had
I am gonna have you say oh
So I am gonna take my time with you girl
Tonight I am gonna have you feeling like
This this this this this this this this this
I love that you beg on me

Girl I bet you didn't expect to feel quite like this
And I bet you didn't think it will feel right like this
But from the look on your face I know you need a replay
... pleasure and pain... have you reminisce for days
About how good it was
Girl you know I am gonna put it down
Give what your body needs
Let me work it out

Chorus

See baby I got you opened and ready for this love you
never had
I am gonna have you say oh
So I am gonna take my time with you girl
Tonight I am gonna have you feeling like
This this this this this this this this
I love that you beg on me
