I'll do anything not to love you  
Close my eyes till I go blind  
Hiding out in a house with no windows  
Better off here where you don't go  
I'll do anything not to love you

So you think that I'm going crazy  
Your hand on my back, your voice in the dark  
Even without a light you see through me  
I hate to think that you know me  
Almost better than I do

And you'll find  
I won't want you around  
I should push you out  
yeah, keep my head down  
and miss you  
till I just don't anymore  
I'll do anything not to love you

And when you stare straight in my eyes  
I wanna tell you  
Where I've been hiding  
I know you're trying to tell me  
Better let you in  
I'm falling  
I can't stay grounded

And you'll find  
I won't want you around  
I should push you out  
yeah, keep my head down  
and miss you  
till I just don't anymore  
I'll do anything not to love you

Just wait a little longer  
Wait here, I'll come around some time  
Hear me, soon I'll be better  
Until then please
