I got everything you need, got the booze and the weed  
And we gon sniff a little white tonight  
Let your addiction just be free and enjoy this company  
Let your body just enjoy the flight

Here's a kid who had so much potential  
Started messing with the meth, begin to fuck with his  
mental  
And he used to be my friend, now he's lost in the dark  
Used to preach Jesus, now the devil is part  
Inside of his soul, hard body and brain  
Why'd he do it to his father so he'd call him insane  
And it's true he needed help, could I have been the one  
to blame  
Could've put him on a different path, showed him  
different ways  
I went to school with him, I was really cool with him  
He was Mr. Popular, he was good at everything  
Football season, 4 touchdowns every game  
He was in the gang and everybody knew his name  
Showed up at my house one week before he committed  
This horrible crime, now his family cried  
And we all up in tears cuz we wonderin why  
Why he set up his life just so that he could die

I got everything you need, got the booze and the weed  
And we gon sniff a little white tonight  
Let your addiction just be free and enjoy this company  
Let your body just enjoy the flight

There's no coming down from here  
There's no coming down from here  
There's no coming down from here  
There's no coming down from here

His father used to drop us off at practice  
We used to go to high school dances  
Had dreams of living in big mansions  
But the drugs started killing like a cancer  
Now he's in the cell and he's facing life  
Father in the grave, widowed, this his wife

One second changed everything around  
Dim, he's got a hold of his soul, they brought him down  
And he could've been a football star  
I know the issues at the crib probly ripped him apart  
Always searching for a chance just to find himself  
And I can't even imagine what his family felt  
Family feels, I know his mind was ill  
So much evil in the room just to kill  
Now his family crying, got us wondering why  
Had to set up his life just to die

I got everything you need, got the booze and the weed  
And we gon sniff a little white tonight  
Let your addiction just be free and enjoy this company  
Let your body just enjoy the flight

There's no coming down from here  
There's no coming down from here  
There's no coming down from here  
There's no coming down from here
