### 1ST Verse (Sean D)

I had pictures painted full of nightmares  
Just when I thought I had it all figured out another  
problem came and it can't be solved  
It's like I'm at a =>BRIDGE to everybody  
looking for answers  
Life is hard but you can deal with it  
No cheat codes but we play to win it  
It's harder to live in reality-more nightmares than  
being in a dream  
Dreaming is easy we can all control it  
No remote control-But it's like a movie played in  
your eye screen  
I wish I could turn my dreams to reality  
Hell yeah everybody is wishing the same thing

### 2nd Verse (Sean D)

What do I know-what do I believe in  
These be the questions I keep asking myself daily  
I'm here, I'm there, I'm thinking a lot  
A click clack change that  
What a world we living in  
This world is a pretty cold place  
You'll have to step up and be a lil brave  
Show no shame and spit yo game  
Do whatever you can to reach your fame  
Everythang I've ever dreamed of has been crashed  
Why does this world unleash its pain on us?  
Life is harsh when you give it attention  
Never notice or else you'll fall up in depression  
A young boy had a dream to be a Pilot  
But due to finance he couldn't make it  
Another one is fully educated-Got a degree  
But can't find a job-why  
They always say it's about who you know and not  
what you know  
Why is it that??

### 3rd Verse (Sean D)

Then I looked around, looking for â€™em answers  
Therefore money is more power  
More money, more power  
Power equals- knowledge  
Nightmares in my life  
Nightmares in my dream  
But thank to God Iâ€™m alive  
God be my provider  
God be my everything  
No trust I canâ€™t find that in a being  
Some friends turn to be enemies  
Enemies turn to be worse  
This world we living in is a jungle  
I wish I could talk to animals  
Maybe they could understand me  
Iâ€™m a equation that can never be solved  
Everybody helps someone for their own benefit  
God forgive us and how do you understand us  
Sometimes I canâ€™t even understand myself  
I turn to be my own stranger  
Love lost-Love found-where the love at  
[Feeling like Bob Marley one love] x2  
Where the love at
