

## Orson "Last Night"

Visit "[Last Night](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Last call unaware of all my surroundings  
Off guard and your cue to begin your scheme  
I took a chance, you took my heart  
And then you took all my money  
I was blindsided by a smile that wasn't what it seemed

I'm talking about last night  
Last night, last night  
Last night, last night, last night

Your mouth was making words  
That seemed at the time very sensible  
Your body trembled and secretly called my name  
You said, "Can I see you later?"  
'Cuz I'd like to spend some time with you"

How could I know that it was only just for show  
'Cuz when the light came on you were gone  
I was standing all alone

Last night, last night, last night  
Last night, last night, last night

Last night, last night, last night

Rock bottom is where's you'll find me if you really want  
me  
Rock bottom with the other victims of your game

Get on the floor, and then you're back for more  
And I'm praying to be your prey  
Maybe you're not too sure, more than you bargained  
for?  
It's the last night we're together

Last night, last night, last night  
Last night, last night, last night  
Last night, last night, last night
