It's tearing me apart inside
It's worth it for you not to realize
The passion
The anger
The person that you have left inside of me

No more sorrow
No more pain
It's easier to walk away than do this again
No more reason to live this lie
I've finally found the breaking point
Fear ends tonight

The pressure to please your heart and mine
Has torn a hole in a world so divine
The passion
The anger
The person that you have left inside of me

No more sorrow
No more pain
It's easier to walk away than do this again
No more reason to live this lie
I've finally found the breaking point
Fear ends tonight

Welcome to my world
With passion
With anger
I'll never let go of what's inside of me

No more sorrow
No more pain
It's easier to walk away than do this again
No more reason to live this lie
I've finally found the breaking point
Fear ends tonight
