"Driftwood"

Visit "[Driftwood](#)" on MotoLyrics.com

Here we are, on the phone
Silence speaks, a thousand words
Where to start? I don't know
Where does love conquer all?

It's been a while since I've seen you smile
Say the word I know the deal
Say to me that you're OK
Then I will go, and let you sleep

They will know I'm always here
Kiss them both and take good care
Half this time, we find our way
Drift back to me, I'll do the same

It's been a while since I've seen you smile
Say the word I know the deal
Say to me that you're OK
Then I will go, and let you sleep

I wouldn't let us drift apart
Give her the chance to change the past
Tear down the guard around my heart
Give her the chance to make it last

I wouldn't let us drift apart
Give her the chance to change the past
Tear down the guard around my heart
Give her the chance to make it last

I wouldn't let us drift apart
Give her the chance to change the past
Tear down the guard around my heart
Given the chance to make it last
