Since you came along
I knew it was done
I had a heart to follow
Then it was said
If better unsaid
Oh, was it hard to swallow

Then came the days
My life in a haze
If you knew what I was under
(you saw what I was, you saw what I was)

So baby, yeah maybe
You'd take me back, so lately
I face death, I ran
And baby here I stand, at your door
And asking for more

It's all up to you
'Cause now I'm listening
So, so you wanted to dance
So baby, let's dance
There's only one thing I need
I just need you to stay
And I'm still waiting for more

Like a bat out of hell
I need you to crash through that door
And now, now that you're here
Ooh, there's nothing I fear
It's all in the past
So baby, let's dance

Mmmm
Mmmm

Since you came along
I knew it was done
I had a heart to follow
Then it was said
(you saw what I was, you saw what I was)

So baby, yeah maybe
You'd take my breath, so lately
I face death, and I ran
Yeah baby, here I am to say
That I'm still waiting for more

Like a bat out of hell
I need you to crash through that door
And now, now that you're here
There's nothing I fear
It's all in the past
So baby, let's dance

I know you're the one
You're always the one
Listen 'cause I 'aint faking
From all that you took
Take off the look

Can't you see now I'm shaking, at your door
And asking for more
It's all up to you
'Cause now I'm listening
So, so you wanted to dance
So baby, let's dance
There's only one thing I need
I just need you
