"Cause Your Watching Over Me"

You life me up to touch the sky
When there's a tear you wipe my eye
Everyone i think should know
Where i am you always go

I close my eye's
I know your here
Open them wide and you appear
I am always safe and free
Cause your watching over me

From the biggest cloud up in the sky
To a tiny spot upon a fly, yeah

Everywhere i choose to be
You are watching over me

I close my eye's i know your here
Open them wide and you appear
I am always safe and free
Cause your watching over me

You are shadow, you are light
You take the darkness from the night
I am always safe and free
Cause your watching over me, yeah
