Sir Bug Out:

Since man first sin, Nothing's changed since  
We still sin against him  
Since we had famines and plagues  
Do we need famines and plagues to make the whole  
world pray?  
Since the commandment's been spoken?  
If we knew he wasn't joking  
Why have they all been broken?  
But we can't wait much longer  
The enemy's hold on this world is getting stronger  
Deceived minds are wondering  
Who steered them wrong?  
Who's responsible for putting them on the track  
that they on?  
The smack they on? Even on the crack they on?  
Without Christ, the chance of them turning back, they  
gone  
Twisted minds leading countries  
Cities with more political figures  
We cast our vote, we ain't learn the scriptures  
Stocks rise and fall, Markets beat up and crawl  
But chart this with a straight line, God ain't change  
at all  
Financial gain is making your brain strange and be on  
top of your game  
But yo, we ain't playing; True Godly men are a  
dying breed  
While it's what we need, it ain't how the papers  
read  
We sin daily, yeah we all fall short  
But nowadays it seems like sinning is just considered a  
sport  
My brain ain't washed, no need to analyze my  
thoughts  
I just recognize the price paid for my new life, bought

Brother E:

Since people prayed to the father  
Ego-trip and calling themselves Jehovah, so why even

bother?

Since people knew what the word sacrifice meant  
We just try to get over what belongs to God, we even  
try to circumvent

Since we took the word of God to the streets, stuck in  
four walls just sitting there under them seats

Since being holy meant a thing, even some Christians  
getting busy before they putting on a ring

We ain't trying to point fingers, we just trying to  
point things out

I heard about couples having sex in church, what's  
that about?

Seems like we lost respect when we decided to drop  
God

Having a form of Godliness looks good but it's just  
a façade

God said to be holy 'cause that's what he is

We should have a greater sense of duty 'cause now  
our nature represents his

So whether we're called or not, whether folks know  
it or not

We gotta sure up our levy so we don't flood out our  
weak spots

C'mon! God told us our speech should remain pure  
Some folks can't help it and their mouths are just  
fountains of manure

He slept with her, she went and did that

Instead of partaking in the convo, we should intercede  
on their behalf

That's right, it's our fallen nature to be ready to  
sin

But c'mon y'all, how many times we gonna play  
on that violin?

Ain't we tired of falling down and having to get  
back up?

Ain't it time to take a stance, seek God and just  
wake up

Sir Bug Out:

Since we had Sodom and Gomorrah

But look around now, we live in the same horror

Since the rocks were crying out but they might start  
now 'cause our praises are dying out

Since Moses led the people out of the land, If Moses  
was here now we'd be grabbing his hand

Since Jesus first touched ground but soon we'll

hear the trumpets sound and he'll come back down  
We're so hype to separate what's known as  
church from state

But man from God that wasn't meant to be, wait

Weâ€™ve been called to be the light so whyâ€™s this world so dark?  
Murder concludes an innocent walk in the park  
Back in the days we were eager to see God, you want proof?  
Remember the guys lowering the ill man through the roof?  
Touch the hand was enough for them back then  
But every now and again we all just forget about him  
We need to feel the Holy Spirit, let him work this road  
And seek direction and guidance to be in Godâ€™s home

Crowned 1:

I mean really, start reaching life the way it ought to be  
Basically, my brethren, Iâ€™m saying wake up and smell the coffee  
Sorry, destructive criticism is like a bad itch  
So place convictional cream and fill the Holy Relief  
Righteous step taking, ya brain is the folder so hereâ€™s the file  
Scrutinize the facts; obviously itâ€™s been a while  
Brother E:

Since our kids could go out and play  
Now they gotta stay inside and play video games all day  
Since you could take a leisurely walk in the park  
During the day itâ€™s intimidating, forget about walking through after dark  
Since children lived with moms and dads  
Today, if you got one you blessed, I know moms was the only one I had  
Since parents even cared if their kids knew God  
Nowadays parents seem like theyâ€™re part of their childrenâ€™s squad
