## Verse 1

Without the sun the earth's beauty don't exist  
And without water fire could just destroy all of this  
What if the grass wasn't green what if the sky was  
never blue  
These answers are unknown like what's me without  
you?  
What's love without pain?  
What's soil without rain?  
What if we never changed and you always stayed the  
same  
What if I never had these questions and always  
counted my blessings  
Would I be sittin here stressing?  
Instead I'm here guessing

## Pre-Chorus

Tryna let you know  
Don't let me go  
Love is what I want just be real  
When they don't love you back I know how that feels  
And I'm trying to make this work  
I'm trying to make you first  
And I didn't know I could hurt just like this  
That's how it feels when the world's unbalanced

## Chorus

I could have it all but without you it won't mean a thang  
I would never go if I knew that you feel the same  
Cuz without you then I can't find my balance  
That's like I'm out of talent  
I gotta find my balance  
If there is no you and me then the world is unbalanced

## Verse 2

Without you in my life  
The world it just ain't right  
I wonder if you think about me through the day  
I hope I never go away  
Never leave your mind  
Cuz you always seem to be on mine  
I hope you know how I feel

I'll always be here to make you smile  
Baby we got a love that's real  
And I'ma be around for awhile

Pre-Chorus

Tryna let you know  
Don't let me go  
Love is what I want just be real  
When they don't love you back I know how that feels  
And I'm trying to make this work  
I'm trying to make you first  
And I didn't know I could hurt just like this  
That's how it feels when the world's unbalanced

Chorus

I could have it all but without you it won't mean a thang  
I would never go if I knew that you feel the same  
Cuz without you then I can't find my balance  
That's like I'm out of talent  
I gotta find my balance  
If there is no you and me then the world is unbalanced
