(Chorus)

Without you, my world is black and white  
Without you without you myself is out of sight  
And I feel like I cant the pain of losing you  
Without you without you..

(v1)

You made me feel like I could fly and touch the sky  
Was falling endlessly without a care or fright  
But then you you left me and my world turned to gray  
Without you without you I swear that I cant stay

(chorus)

Without you without you my world is black and white  
Without you without you myself is out of sight  
And I cant take the pain of losing you  
Without you, without you
