[INTRO]

Feels like the sun beams blink at me  
Again the sun is aiming me,  
I'm on the edge of the world and I'm alone  
Unmotivated.

[Rap]

Pulling me back in - shadows know the pain  
they share their home shield - protecting me from your  
lies  
inside that cold disguise, is that where you were hiding  
for?  
it's a shame how pain making us..equal.

[Clean]

And hold your breath, cut your middle finger  
sit on the edge close your eyes  
Can't you see now?  
Can't you see now?  
You left the answer

[Pre-chorus]

Cause the moment you see your true self!

[Chorus]

Standing by - that's how I finally realised  
that everything's just a rusted name tag  
(x2)

[Rap]

Pulling me back in - swallowing hurricanes  
your soul is homeless , trying to flee from the light  
but it can never hide! just standby..  
when my skin isn't as thin, as the skin you're in  
and switch..

[Clean]

And hold your breath, cut your middle finger  
sit on the edge close your eyes  
Can't you see now?  
Can't you see now?  
You left the answer

[Pre-chorus]

Cause there's a moment you see your true self

[Chorus]

Standing by - that's how I finally realised  
that everything's just a rusted name tag  
(x2)â€”

[Bridge]â€”Trying my best to relieve the stress  
but the pain dwells deep within as I confess.  
All over your mind, everything's reset again  
So stay with me - Forget the escape plan  
I've tried to escape but I'm half the way,  
And I make a mistake with every step I take  
All over your mind, everything's reset again  
Just be with me - Forget the escape plan  
Forget the escape plan..  
Forget the escape plan..

Sink now down below..  
We will float again (Leaving you).  
On your Own...  
(x2)

[Durahmâ€¦Durahm..Durahm] (. . .)

[Chorus]

Standing by - but now I cannot realise  
why everything's just a rusted name tag!  
(x2)
