She's a killer..
She's a keeper...
Am I blurry
In your vision
Was I just..
A poor decision?

Cut me open
With precision
And we'll finger
The incision
Tell me what have I done?
Quid pro quo

To watch you lose
Control

I will give you sanctuary in these hymns of Thanatos
I will give you sanctuary

You want to see me burn
I am living fire
You want to see me burn
I am living fire

You will know me by the scars I bare
You will know me by the hate I swear
You will know me by the scars I bare

Shameless
Vengeance

We are the thousand children of death
We're in between on the fence
Nondescript antagonist
I'm in between on the fence
Non descript antagonist

I split you open
Climb inside
Lose myself

Eaten alive

We are the thousand children of death
From the seraphim, To nephilim, Exodus
She's picking ghost flowers from her soul
She's clipping the wings of fallen angels
She's picking ghost flowers from her soul
She's tonguing splinters of broken halos

You will know me by the scars I bare
You will know me by the hate I swear
You will know me from the scars I bare
You will know me

From gelatin, To specimen, To emptiness
I will be avenged
I will be avenged

These are the secrets
That kill
That kill
That kill
That kill
That kill
That kill

We are the thousand children of death
