Now my dear friend  
Now for your sins  
You're to suffer  
Here it begins

Drag ropes forward  
Shame will save you  
Out moves inward  
Turn of the screw

Gallows free you  
Dawn's release  
Hood to blind you  
Be at peace

I was immortal but I am your friend  
To stay and be beside you  
Always here (I'm human too)  
And always with you now

Lies are manifold and the truth can now be told[repeat]

Now my dear friend  
Now for your sins  
You're to suffer  
Here it begins

I was immortal but I am your friend ('til the end)  
To stay and be beside you  
Always here (I grieve for you)  
I'm always with you now
