On and on we could go
On and on this way forever
Willing to feel
Love and pain
Only in careful measure
Never asking for too much
Never taking more than we need
Guarding our trust
Like frightened refugees
I've seen your picture in the story of love
A thousand words could never say enough
I know your history could turn on us
Let's start a chapter in the story of love
Promises are made
And promises are often broken
Don't let it take away the meaning of these words I've
spoken
Wanna make that leap of faith
To the arms of eternity
I'll be unafraid but you got to be there for me
I've seen your picture in the story of love
A thousand words could never say enough
I know your history could turn on us
Let's start a chapter in the story of love
In the story of love
In the story of love
Alone and never easy
Together hard but easier
Understanding what I need
And it's union, communion
The very best of everything
The best of everything
I've seen your picture in the story of love
A thousand words could never say enough
I know your history could turn on us
Let's start a chapter in the story of love
In the story of love
In the story of love
