Visit "[Turn Around Now](#)" on [MotoLyrics.com](http://MotoLyrics.com)

where does your energy come from  
recent events forcing us to form  
a new way of thinking and open up a door  
to a new generation so

turn around now, we're in a dead-end street  
turn around now, last chance to change the route to  
meet  
turn around now, demands by nature are crystal clear  
turn around now, do you want our planet to suffer  
defeat

nps go all out to destroy us  
time is now to turn this sinking ship around  
all we want is sustainable energy for all  
the human race is supposed to act, this concerns us all

where does your energy come from  
recent events forcing us to form  
a new way of thinking and open up a door  
to a new generation so

turn around now, we're in a dead-end street  
turn around now, last chance to change the route to  
meet  
turn around now, demands by nature are crystal clear  
turn around now, do you want our planet to suffer  
defeat

don't you dare pretend that you do not care  
you can't just sit at home and think it'll get  
solved by itself get it together before the universe  
melts  
please do not stay calm and act, this concerns you too

where does your energy come from  
recent events forcing us to form  
a new way of thinking and open up a door  
to a new generation so

turn around now, we're in a dead-end street  
turn around now, last chance to change the route to

meet  
turn around now, demands by nature are crystal clear  
turn around now, do you want our planet to suffer  
defeat

we owe it to the next generation  
the air we breathe, desperation  
haven't we learned from the past  
they'll thank us that we chose the right path  
got the stone rolling into the future  
you and me, let's spare the nature  
to save us all, we won't back down anymore  
we'll get up, finally stand tall

where does your energy come from  
recent events forcing us to form  
a new way of thinking and open up a door  
to a new generation so

turn around now, we're in a dead-end street  
turn around now, last chance to change the route to  
meet  
turn around now, demands by nature are crystal clear  
turn around now, do you want our planet to suffer  
defeat
