So much of moving is just moving on  
Whenever you're choosing then something is gone  
The lesson is clear, just keep your heart in your chest

There's no denying the fun that was had  
Not all your hazy grey memories are bad  
The road is gonna end, you really did give it your best

The night is full of black and blue  
Like the walls are closing in on you

If you can find away then you can run away  
You can blast your way out  
If you can find away then you can run away  
Never ask, never doubt  
Blast your way out

Your mama called me to ask how you are  
Your mama called me and I see just how far you've  
drifted away  
From all of the truth you believed

What joker said that we reap what we sew  
Some broken sinner who just didn't know  
That we must take control, dust off our coats and just  
leave
