"Down In The Deep"

Visit "[Down In The Deep](#)" on MotoLyrics.com

Leave me down into a source of comfort
Leave me down until I'm over
Spring will come into our dream
How to grab and steel

All those words had lay their weight on your head
All those words from somebody outhere
Holes and scars made the water rain
Distance is what made you save

A shining symbol and true emotion
There a is a lake full of inspiration
Who will clean you down in the deep
Fill an ocean with a new believe

All those words lay their weight on my head
While their points of view they all bore me to death
Come close and see what I have done
Come close and see what I've become
