You know me better than I know myself
Inside and out
And I could never be with someone else

'Cause you come to me
And you comfort me
My shelter in the storm

And you take away the rain
You give me back the sunlight
When you hold me in your arms
Like you did last night

You take away the rain
You put it off until tomorrow
Now don't you ever change
Can you please just stay the same
'Cause you take away the rain

You got your issues, I got mine as well
It don't matter
'Cause I'm beside you dreaming in the clouds

'Cause you come to me
And you comfort me
My shelter in the storm

CHORUS

It's falling down, I'm calling out
My heart was shattered until we met
It's falling down, I'm calling out to you again
