Coming out of nowhere  
Running from the rain  
Rocking on a groove  
Cryin out again

Sing a little high  
Sing a little low  
Everything we do comes down to  
Rock and roll... yeah

All I want to be  
All I wanna know  
Got to feel the power  
Lose control

Is everybody there?  
How about you  
Come on over here  
Get in the groove

Another ride  
Another day  
We've come and gone  
A long long way!  
Unisonic, unisonic, unisonic

Chuggin like a monster  
Buzzin like a hive

Everything is set  
To overdrive

Give a little here  
Take a little there  
Living on the edge but  
I don't care.

Another ride  
Another day  
We've come and gone  
A long long way!

Unisonic, unisonic, unisonic

Comin out of nowhere  
Healing all the pain  
Summoning the demons  
From your brain

Frisk you up  
Shake you down  
Listen to the sounds around  
And when the stars will come alive  
A million voices fill the sky  
And then a sound will shake the night  
It's Unisonic!

And there's no end to come I know  
There is no enemy or foe  
We're cryin out for all the world to know:  
We're Unisonic!  
Unisonic!  
Unisonic!  
Unisonic!  
Unisonic!
