Winter came to soon  
And I've got all these questions  
No one to ask besides the moon

The listener I knew  
Got lost in the blizzard  
A storm swept in  
Left me in pieces

How you cried  
How you cried

Something evil I love  
Nothing's cold to me enough  
And it's shaping my black heart  
And she's dead inside

Winter came tonight  
Bringing all these memories  
Polaroids they fade alright

The voices in the dark  
Echoes over roof-tops  
Calling me  
Stay from the light

How you cried  
How you cried
