

## Over It "Ignore The Noise"

Visit "[Ignore The Noise](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Safer than a serpent till we got a load of  
The company you're keeping around for us to take care  
of  
We decorate the picket fence with mercy where I'm  
from  
And fools like you can't mess with mom and get away  
I still pray the TV is lying

It won't take too long when you're short of time  
To point out some good left about mankind  
You can learn to love what you can destroy  
That's what I call sacrificing what you've got for  
freedom

Captain do you copy? Right under the radar?  
Valor, faith and treason chivalry that you make sin  
Guess business will be business  
We all know boys will be boys  
One day I don't want to teach  
My children to ignore the noise

Can't we find a shred of hope to dress this fear up?  
Will we let the banner of humanity fall?  
That's not what I call sacrificing  
What you've got for freedom  
Give up what you've got for freedom
