Much before I met you
I thought only things of you
Thought that I could reason one thing

Much before I met you
There was nothing I wouldn't do
I would try anything, oh

So why don't we just say
What we have to say
Why don't we just wait a while
And move on anything

Won't you just wait for me dear
Cause I know you've come all this way
Won't you just wait for me dear
Cause I know you've come all this way

Now because I met you

There's so much I wanna do
And our time slowly slips away

So why don't we just say
What we have to say
Why don't we just wait a while
And move on anything

Won't you just wait for me dear
Cause I know you've come all this way
Won't you just wait for me dear
Cause I know you've come all this way

(Instrumental)

Won't you just wait for me dear
Cause I know you've come all this way
Won't you just wait for me dear
Cause I know you've come all this way (x2)
