Visit "[Hide Away](#)" on MotoLyrics.com

There's something stirring in your eyes
A crime we won't compromise
You make me sick the way you choose
The fate of those you abuse

You can hide away
You can hide away
you can plan your great escape
But we, yeah we, will bury you

There's someone straying in the breeze
Someone craving your disease
We will haunt you for what you've done
I pray your ready, here we come

You can hide away
You can hide away
you can plan your great escape
But we, yeah we, will bury you
