Turn your head against the wall
(You turn your head against the wall)
Cause you're never far away from the nearest fall
(Never further from the nearest fall)

You're just off now
Don't look back
Calling me, calling me back
You're just off now
You don't have...
Calling me, calling me back

Take the weather, face the wall
(Take the weather, face the wall)
Cause you don't know how it feels until you fall
(I will face until fall)

You're just off now
Don't look back
Calling me, calling me back
You're just off now
You don't have...
Calling me, calling me back

If you still had me
You could be happy
But you still want me
You still want me

Yea, if you still had me
You could be happy
But you still want me
You still want me

You're just off now
Don't look back
Calling me, calling me back
You're just off now
You don't have...
Calling me, calling me back

If you still had me
You could be happy
But you still want me
You still want me

Yea, if you still had me
You could be happy
But you still want me
You still want me

(If you still had me)
You're just off now
Don't look back
Calling me, calling me back
(But you still want me)
You're just off now
You don't have...
Calling me, calling me back

(If you still had me)
You're just off now
Don't look back
Calling me, calling me back
(But you still want me)
You're just off now
You don't have...
Calling me, calling me back

You could be happy
You could be happy
Calling me back
If you still had me
You still want me
Calling me back
You could be happy
