Our hearts collide, We become one  
From the moment you looked through my eyes  
Time has stopped, theres no one around  
The words my lips speak, they seem to find

I've thrown away fear  
I see a new light  
My future now holds a glorious site  
Forgive my thoughts  
Open your heart  
Embrace my love as a new start

[Chorus:]  
Breath me in, Ill breath you in  
Can you hear me callin' out  
For your love i scream out loud  
Do you hear the yearning in my voice  
The road ahead is meaning less  
Without the taste left from you kiss  
Will you be my Glorious site?

Please believe I need you here  
My sun only shines when you are near  
And don't forget times we've shared  
The moments when i thought you really cared

Breath me in, Ill breath you in  
Can you hear me callin' out  
For your love i scream out loud  
Do you hear the yearning in my voice  
The road ahead is meaning less  
Without the taste left from you kiss  
Will you be my Glorious site?  
Please be my Glorious site

Breath me in, i'll breath you in
