Blinded by a thousand eyes
Trying to break free
Trying to break

They tell stories of regret and pain
Of the day, of the day that would rot away

Just hold on to what we have.

Into a plague, made with all their lies
Into a plague, made with all their cries
Into a plague, made with all their lies
Into a plague, made with all their cries

A thousand and one hands
Chokes out the glow in us
Our enemies never forgot,
The shit we pulled that day.

I still remember the look she gave me
I'm so sorry there is no other way
Cause I refuse to fall, in the eyes of my girl's

Cause I will always fight for my own pride

Cause I will always fight

Cause I will always fight for those close to me

Stay close to me (close to me)
And we'll always be
What we've wanted to see in us

What we've wanted to see in us

Never forget we treasure your heart's
Never forget what I did for us. x2

What I did for us.
