A knuckle duster is the most deadly in the ponderous
pace of floating justice single-handed dynamo. Take it
now, say the way we want and not for you to point the
finger combustible in a word fuck'n. Say the word and
you'll be free. Continue your journey Superman say I
am we can put you down not a wizard-boy question just
a demonstration of definition. Silver city crusading to
the top of a fug'n bone break most vile experiment
ready to eat your ass. Clockface.

Bigtime. We are. Somekind. Say it. Like always. Sound
+ silence promote the zero. A steel hammer game
from me to you, but I don't mind the matter. Ratmouth
don't know what you need just know what you want.
'Walking dead' crawling bloodthirsty Hollywood demon
flower grow in the Valley of Love like a freak highway
accident. Last ride rolling down say hi-density. Glory
stomp gonna make the girl in the room + in the house
turn and see that I ain't there...
