I will always cherish the memories
I will always cherish the memories

I think it came out pretty damn good myself, I don't
know what you guys think

I will always cherish the memories

I have to admit that I've sat in a drunken stupor
While we're cruisin' down the highway at four in the
morning, and I've sat in a drunken stupor...

I know I don't get down here enough

That's, Trey
Hence the guitar player

You are a bad time

We're here, we're here, we're here
I will always cherish the memories
We're here, we're here, we're here
I will always cherish the memories

We're here, we're here, we're here
I will always cherish the memories
We're here, we're here, we're here
We're here, we're here, we're here
I will always cherish the memories
We're here, we're here, we're here

I know I don't get down here enough
I know I don't get down here enough

I know I don't get down here enough
