One more broken dream but it don't matter
If it seems your dreams are all shattered
New dreams come along,
And sometimes there just as strong as the one that's
gone
So don't cry little angel little angel don't be blue

But you can live your life in sorrow
Or move on to a new tomorrow
And you can laugh about this place
A different smile on a different face waits for you
So don't cry little angel little angel don't be blue

Everything you know is upside down
Don't you worry it will turn around
Feelin lonely aint no crime
And nothing heals like time

So don't let the world pass by you
Just leave all your cares behind you
There's a crossroad up ahead so be careful where you
tread
So be careful where you tread when you pass through
And don't cry little angel little angel don't be blue
(lead)

When the world you know turns upside down
Don't you worry it will turn around
Feelin lonely aint no crime
And nothing heals like time
(stop)

So just let the road pass by you
Just leave all your cares behind you
There's a crossroad up ahead so be careful where you
tread
So be careful where you tread when you pass through
And don't cry little angel little angel don't be blue
And don't cry little angel little angel don't be blue
Don't be blue don't be blue
