

Working For A Nuclear Free City "Silent Melody"

Visit "[Silent Melody](#)" on MotoLyrics.com

If ever we drop
Remember we lost
Inside the reasons
Whatever we'll know

A silent melody
A surface memory
A sound symphony
Became a part of me
A sudden shift between
A different frequency
My hand has spread the sea
It's like there's a god in me

And when the fear comes
White amber rain falls
A somber wind calms
I'm under his thumb
What have I let go?
What have I become?
I don't know either
Whatever we'll know

A silent melody
A surface memory
A sound symphony
Became a part of me
A sudden shift between
A different frequency
My hand has spread the sea
It's like there's a god in me
A silent melody
A surface memory
A sound symphony
Became a part of me
It's like there's a god in me

It's like there's a god in me

It's like there's a god in me
