Maybe There's A Way

When I think of our time together
It seems like only yesterday
I held you so close to me
But now you're so far away

Maybe there's a way I can live without you
But it might take the rest of my life
Maybe some day I can forget about you
It won't be tomorrow or the day that I die

I can search the world over
But I know that when I'm finally through
It doesn't matter what path I take
All roads lead back to you

Maybe there's a way I can live without you
But it might take the rest of my life
Maybe some day I can forget about you
It won't be tomorrow or the day that I die
