(Intro)

Can't get no pleasure standing on your head
Like you can't believe a single word of a single thing
they've said
Will they catch me this morning, is on your mind
Or will it be another day you get away with crime

But you'd better know what to do
To see the change from old to new
And if you know how they feel
They might think twice, then you'd be in jail

So ya move to the country
Where your access shows
Everyone a mile away that's comin' up your road
But still when you get stoned
You feel he's on his way
So ya spend the next whole hour tryin' to hide your
stash away

So you better know what to do
When they come looking round for you
Cause if they see how you feel
They might think twice, then you'd be in jail

(Guitar solo)

Can't they see it ... comin' ahead
Big change comin' ... change for the best
They can't stop it ... no way to try
Change comin' from within us
It comes from inside

So you better know what to do
When the seasons change from old to new
And if they know how to bend
We might be saved, we'll all get them high today

(Guitar solo)
