I've looked her in the eyes for the last time
Tears fell down, they were so bitter
She asked me not to forget, it felt like the last
Summer While I said something like:
"Love never dies." Didn't know that it was the last night
When it was so, so near I remember only this
When I saw her the last night
Last sight kept me remembering
Last disappointment that I won't forget

Chorus

Wherever you are I will find you
Wherever you are I will love you
Whenever, night or day I will find you
When will I love you to myself
My sweet one, my bitter one... I will find you...

Every evening when she tries to go to sleep
Cry and listen a piece of her preference
Because I make and I sense her so much closer
She reminds me of us and of our last night
The last kiss on cold lips I sense her
trembling with bitter mouth I kiss you all night in a
dream That's the real ghost of the last Summer
Last sight kept me remembering Like a dream, like a tale
lost in clouds

Chorus

At night or at day i will find you
I will love you my bitter one... I will find you...

Chorus

I will love you at night under the starry sky
Like in a nice dream of mine I will find you
I will hug you tightly like the last night,
I will always be near you
When I find... you.
