I see your body talking to me its saying
Hey come over here (come, come over)
So let me break the ice show you what i'm like
When we get up out this atmosphere (ah-atmosphere)

So grab your coat cause we're leaving now
Girl where your going is out-out of town
Lets tear it up all night and if you want more
Then baby you can come back tomorrow and...

We can do it all over, over again
And we can do it all over, over again x2

Right foot down and my head held high
We'll be moving so fast its like we're touching the sky
Girl you'll be out of breathe till the sweat drips of your
neck
Feel the adrenaline rush, rushing through your chest

So grab your coat cause we're leaving now
Girl where your going is out-out of town
Lets tear it up all night and if you want more
Then baby you can come back tomorrow and...

We can do it all over, over again
And we can do it all over, over again x2

Girl lets leave before it gets too late
Its now or never
Let me be your midnight escape
Lets make this a night to remember

So we can do it all over,
over, over x8

We can do it all over, over again
And we can do it all over, over again x2
